

Levelling System
±15° tilt and 360° pan

Handle Control
and removable

Rifle Clamp
head option (GM)

Arca/Picatinny
head option (PR)

ENDEAVOR RL

Designed for precision shooters, this system features a levelling base that is easy control with the handle, and is removable for flexibility.

THE LEVELLING SYSTEM

Endeavor RL models include a “Removable Levelling” system that can tilt $\pm 15^\circ$ and rotate 360°

Simply release the lock by turning the handle below the base, move to your preferred position and lock it. Simple and intuitive, and this:

- Allows you to level your rifle on uneven terrain in seconds
- Allows you to adjust your point of aim with ease
- Gives you a comfortable hold on the tripod for additional stability and then respond quickly to movement

MAXIMISING VERSATILITY

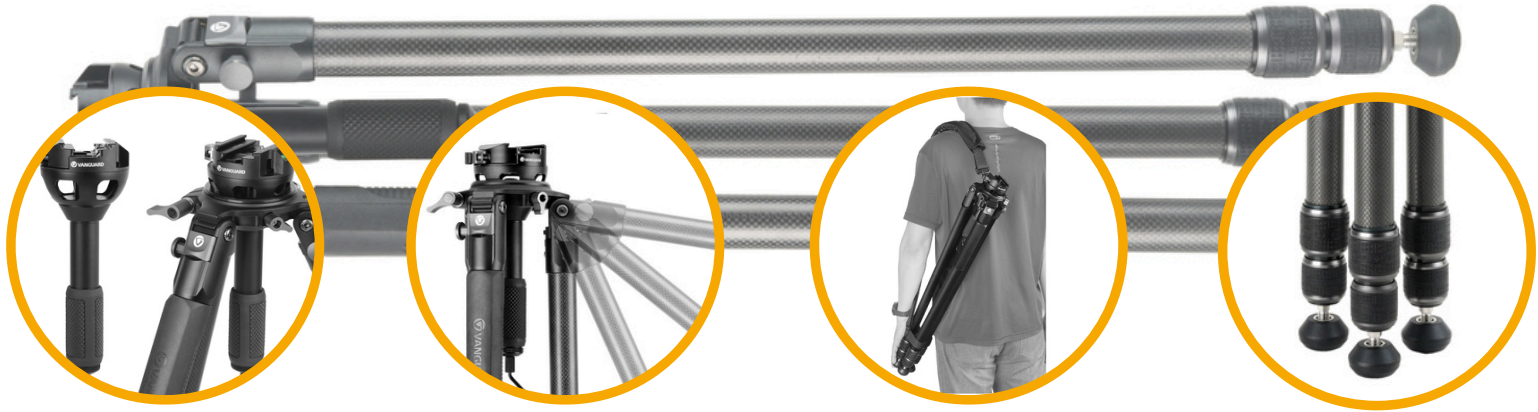

Alta Pro 3VRL parts available separately

TIP

There are screws in the base of the removable “Platform” and “Level” to ensure a solid fit to your chosen head

COMMON FEATURES

Levelling System
±15° tilt and 360° pan

3 Easy Set Leg Angles
23°, 50° & 80°

Shoulder Strap
for easy transport

Rubber & Spiked Feet
& easy clean leg locks

"GM" MODELS

"GM" models include a removable **Endeavor GM-70** Gun Mount, a universal rifle clamp that can fit any forestock from 30mm to 70mm, with an oversized handle that is easy to use in any conditions, and a rubber inner to protect your rifle. The clamp is attached with a 3/8" thread, and includes an Arca compatible base, so it can also be used on any suitable tripod or any of the "PR" models.

"PR" MODELS

PICATINNY

ARCA

"PR" models include a built in, dual clamp system. The top clamp is designed to fit Arca compatible plates (like the Endeavor GM-70 or many spotting scope feet), and the lower clamp is designed to hold an Endeavor Picatinny Rail securely.

TIP

If you want the tripod to hold your rifle securely in place and free your hands, but need to adjust your aim quickly, then simply leave the levelling system slightly loose.
